LeBOSQUET'S LOW PRESSURE Steam Heating Apparatus.

The marked success which our Boiler and work have achieved, warrants the assertion that for thoroughness of construction, economy, and efficiency of operation, it has no equal in this country. Apparatus erected with low pressure, indirect radiation, dispensing entirely with Radiators in the apartments, locating the whole Apparatus in the basement; or by direct radiation, supplying heat from ornamental Radiators within the rooms. Either method employed to suit the wants and taste of purchasers.

Our Portable Apparatus is most admirably adapted for Residences, School-houses, Banks, Stores, &c. It is compact, handsome in design, and moderate in cost.

Our Pamphlets, with names of users of the Apparatus, furnished upon request.

The reason New Englanders patronize the **GRAND UNION HOTEL** is that everything is first class clean and neat, and the prices moderate.

Unequalled facilities for every branch of **DETECTIVE** service.

INSTRUCTIONS TO KEY HOLDERS.

1. On the breaking out of a fire, notice should be immediately communicated to the nearest Alarm Box, Keys of which are always in the hands of the Police, and responsible persons in the vicinity of the Boxes.
2. Key holders, upon the discovery or pos-

itive information of a fire, will unlock the box, pull down the slide or hook once, and let go. This gives the desired alarm all over the city, repeating itself five times.

3. All persons giving fire alarms are requested to remain by the box a moment, and if no clicking is heard in the box, pull again; if you still hear no clicking, go to the next nearest box and give the alarm from that.

4. Never signal for a fire seen at a distance. Never touch the hook except to give an alarm of fire. Be sure the box is locked before leaving it. Give an alarm for no cause other than an actual fire. Do not give an alarm for a chimney.

5. Owners and occupants of buildings are requested to inform themselves of the location of the signal boxes nearest their property, also the places where the keys are kept. Be sure the alarm is properly given. One single stroke of the alarm Bell and Engine House Gong is not given for an alarm of fire.

6. Alarms will be sounded on the Fire Bells thus: For box 5, five strokes, 1-1-1-1-1, with short intervals and repeating. For box 32, the strokes, 1-1-1, a pause, then two strokes 1-1, a pause, and repeating. Alarms for other numbers are given in a like manner.

7. Ten successive strokes upon the Alarm Bells will be given as a signal for calling out the whole Fire Department.

CAUTION—Never pull the hook while the Alarm Bells or the Gong in the box are striking.

WILLIAM C. SMITH, *Supt.*

COLLEGIATE & COMMERCIAL INSTITUTE,

Nos. 15 and 17 Wooster Place.

The Institute offers courses of instruction in the Greek, Latin, English, German, French and Spanish languages; Mathematics and the Physical Sciences; in History, Moral and Political Science; and in Penmanship, Book Keeping, Drawing, Phonography, Reading and Elocution. The regular course in the department preparatory to Yale College, occupies three years; but full opportunity is allowed to those who can prepare more rapidly. No student is held or turned back in one of these studies for deficiency in any other; thus avoiding an evil that exists in schools, arranged on an annual plan of connected studies. There are special courses arranged for those who are to enter the Scientific School and for those who are to follow business pursuits. The unusual proportion of teachers to pupils, the larger range of studies, and the greater number of classes, formed to meet the wants of the students, make it possible to consult the taste and ability of each pupil, and to allow of his full progress, to a greater extent than can be done in schools whose classes are formed on an arbitrary system only. Parents will find in the instruction given in Military Drilling, Gymnastics, Swimming, etc., and in the ample grounds for out-door games under careful supervision, just the advantages for physical training and vigor, which boys in cities need. The Boarding Department is designed for pupils who do not reside with near relatives in New Haven, and to secure to them those family advantages and that paternal care and moral and religious discipline which their age so obviously demands.

The school was established in 1660.

Its chief design is to prepare boys for the Classical and Scientific Departments of Yale College.

For those living in New Haven and vicinity, the best time of entering is at the age of eleven or twelve.

The course of study embraces not only Latin, Greek and Mathematics required for admission to College, but all the common English branches.

Particular information can be obtained by calling for circulars at the city bookstores, or applying to

YALE BUSINESS COLLEGE.

Office, 37 Insurance Building, New Haven, Conn.

DESIGN—To fit young men for business life.

HOW IT IS DONE—By a thorough theoretical course of study and by actual business experience in detail.

THEORY DEPARTMENT.

Double Entry Book-keeping, Business Correspondence, Penmanship, Arithmetic, Commercial Forms, Lectures on Business, Ethics and Commercial Law. After passing the required examination, the student enters the

PRACTICAL BUSINESS DEPARTMENT.

Here the student really engages in business. He buys and sells from and to his fellow students.

He makes and accepts drafts. He opens a bank account in the usual way. He gives notes and effects discounts, and after entering into co-partnership, and engaging in various kinds of business, he enters the business offices and works his way up to the position of *cashier of the bank*. He makes up his graduating papers, and after having passed a *thorough examination*, receives his diploma.

In connection is an English and Classical school for young men and boys.

Steam Mains through the principal streets, and extensions being made as required by increasing demand from resident localities.

Parties using Steam furnished by this Company can always rely upon having abundance of steam for heating in the severest weather, either day or night, and avoid all the inconveniences and annoyances attendant upon management of ordinary heating apparatus, such as getting in fuel, removal of ashes, necessity of attendant to look after fires, unavoidable gases and dust which are injurious in the highest degree, and last but by no means least, constant danger from fire.

Parties are cordially invited to investigate our system, and information will be cheerfully given on application at the Superintendent's Office.

FIRE INSURANCE.

All kinds and descriptions of property insured against loss by fire, in the strongest American and Foreign Companies.

The Largest and Most Successful Agency in the City.

We refer to our record of thirteen years' experience in the Fire Insurance business in this community, as well as to the following parties, to whom we have paid losses varying from \$100,000 to \$1,000, viz: Sperry & Barnes, L. Candee & Co., New Haven Wheel Co., H. B. Bigelow & Co., Edward Malley, Samuel Peck & Co., New Haven Steam Saw Mill Co., Henry Hale & Co., New Haven Folding Chair Co., and others. We should be pleased to have any parties contemplating INSURANCE, consult with the above as to the manner in which we settled and paid their losses.

Connecticut Electric Lighting Co.

Office No. 6, Factory No. 29 Temple St.,

NEW HAVEN, CONN.

Sole licensees for Connecticut of the United States Electric Lighting Co. are now prepared to furnish Electric Lights for outside or inside use at prices which are as low as any other Company in the Country. Dynamo Machines and Lamps always on hand, and for sale, for isolated Plants. We should be glad to refer any one seeking trustworthy information on this subject to Factories, Stores, Hotels, Railway Stations, Switching Grounds, Foundries, Mills, Private Residences, Public Buildings, Docks, Streets, Parks or Local Light Companies and other impartial parties who have tested our apparatus. The Brooklyn Bridge, the Elevated Railways and most of the larger avenues in New York City are lighted by our lamps.

THE NEW HAVEN UNION.

DAILY,	SUNDAY,	WEEKLY,
\$8.00 per year.	\$2.00, postage prepaid.	\$1.00 per year.

The only Eight-Page Daily Paper in Connecticut, the DAILY UNION, has the largest circulation of any paper in the city of New Haven, receives the full dispatches of the Associated Press, and is universally acknowledged to be the best local paper in the city. Circulation in Meriden 1500 copies.

The Sunday edition of the UNION is the leading Sunday paper in Western Connecticut, and has a very large circulation. All the matter is specially prepared for this paper with the greatest care. Its sales on the streets of New Haven alone are about 5,000 copies, besides what are delivered by carriers at the residences. Our Sunday edition also goes into four of the eight counties in the State, viz: New Haven, Middlesex, Litchfield and New London. It is served by carriers and sold on the streets by newsboys in all the towns and cities northward to Meriden, southward to Bridgeport, eastward to New London and westward to Winsted, comprising altogether about forty places. As an advertising medium it is unequalled in the State.

The WEEKLY UNION is published on Thursday morning, and is made up from the Daily and Sunday editions of THE UNION. It is in every respect a family paper, and besides containing all the news of the week has a liberal amount of choice miscellany, stories, reading for farmers, etc. Price \$1.00 per year, postage prepaid.

The **X-L-C-R** or**IMPROVED CIRCUMSHOT WATER WHEEL,**
ON HORIZONTAL SHAFT.

Saves cost, annoyance and loss of power incident to use of gears; and having the same superior qualities of the I X L, it makes—wherever applicable—an efficient and desirable motor, invariably proving satisfactory and popular wherever introduced.

**THE X-S TURBINE** Diminutive in Size, mighty in power, and great capacity to use water.

Designed expressly for situations where limitation of space, or cost, is more important than the highest useful effect from the water. NOT RECOMMENDED FOR ECONOMY, as the excessive application of water always involves loss of efficiency, which is generally unprofitable, and often positively wasteful, particularly on falls of moderate height; but when a departure from correct principles is desired, the X S is specially applicable with any degree of excess from the least to the greatest practical limit. Its "possibilities" in this line are not exceeded by any other wheel yet produced.

The I-X-L is X-L-NT and UN-X-LD.

The attention of Architects, Builders and Carpenters, is called to

THE DUDLEY BLIND AND SHUTTER-WORKER

The only practical fixtures for opening and closing Blinds and Shutters from the inside of the house, without raising the windows or removing window screens, and can be operated by a child.

ITS ADVANTAGES.

It prevents all *slamming* and *rattling* of blinds, and saves *breakage of glass* and damage to the blinds themselves. It is very useful in *sudden storms* as it holds the blind or shutter firmly open or closed, or in any intermediate position. It forms a *complete lock* to the blinds when closed, which cannot be tampered with from the outside. It is a *strong and durable* fixture, and *cheaper in the end* than the common blind fastenings now in use. It obviates the use of *inside blinds* (which catch dust and cobwebs), as by this fixture the *outside blinds* can be opened and closed as easily as *inside blinds*. Endorsed by leading Architects and Builders, and in use on many public and private buildings, where the Blind-Worker can be seen in operation, and at **Morgan & Humiston's, 146 State Street.**

THE AMERICAN PHOTO-LITHOGRAPHIC CO.,

Established 1866.

OFFICE (EVENING POST BUILDING), 206 & 208 BROADWAY, N. Y.

ARE PREPARED TO COPY

LINE ENGRAVINGS,	WOOD ENGRAVINGS,	PRINTED LETTER-PRESS,
LITHOGRAPHS,	MUSIC,	MAPS, Drawn or Engraved,
ARTISTIC PEN DRAWING,	ARCHITECTURAL PLANS,	MECHANICAL DRAWINGS,
MANUSCRIPT LETTERS,	DOCUMENTS,	ENGINEER'S PLANS,

AND EVERY VARIETY OF LINE WORK BY

OSBORNE'S PROCESS OF PHOTO-LITHOGRAPHY,

IN THE HIGHEST STYLE OF THE ART.

Copies may be had in fac-simile and of any size, whether enlarged, reduced, or of full scale, with absolute accuracy and economy, the transfers being made by Photography instead of the hand of an artist.

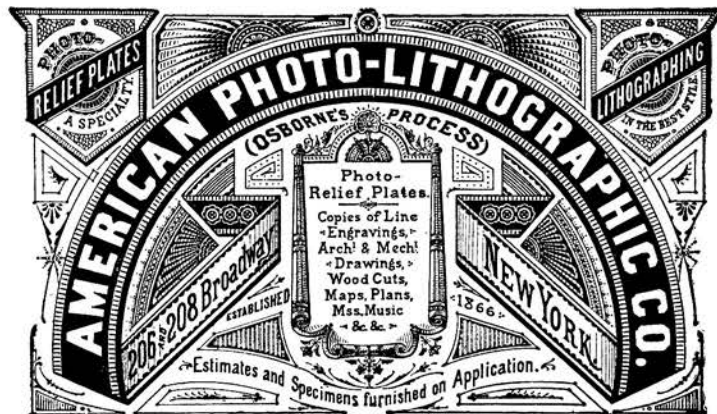

Drawings should be done IN LINE, with Black (Indian) Ink, on smooth white paper. The process is not adapted to ordinary photographs, possessing half-tones or tints and views direct from nature, nor drawings shaded in ink or water colors. These are first traced or drawn by our artists in lines. The advantages of this process commercially and artistically are very many, and its products excite general admiration.

We call particular attention to our

PHOTO-RELIEF PLATES

for Letter-press printing. A superior substitute for woodcuts, at much lower rates.

Originals should be forwarded rolled (not folded), when possible.

HARVEY W. PEACE CO. Limited,

MANUFACTURERS OF

SAWS OF EVERY DESCRIPTION.

No. 4 P5

This Saw combines the latest and most valuable improvements in Hand Saws. The position of the handle and manner of attachment render the blade stiffer and less liable to buckle, admitting of the full sweep of the cut without possibility of catching in the work. The position of the heel, with the steel passing entirely around the hand piece, renders the handle less liable to break. In consequence of these improvements this saw will "hang" better in the hand and work with greater ease. It is warranted unequalled in utility and quality. All these new features are patented.

Price List on application.

In calling attention of the trade to our new saw No. 4 P5, we would say, we are much gratified by the favor with which our Hand Saws are received by the trade and mechanics generally, and wish to assure our friends that the high standard and reputation of our goods will be fully maintained.

IMPROVED Sarven Wheels.

The accompanying cut shows the position
of the **ROUSE HUB BANDS**.

These bands are made of the best Malleable Iron and almost cover the hubs, making them proof against decay and damage by collisions in crowded streets.

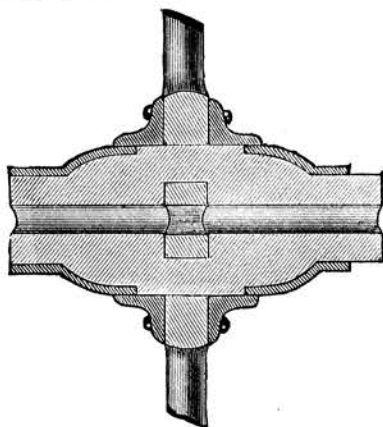

Beware of imitations as there are several on the market. See that your Wheels have two separate bands besides the flanges, making in all four (4) distinct iron bands around the hub.

We are also manufacturers of the Celebrated STODDARD WHEEL, a great favorite for light wagons and coaches.

The largest stock of ready-made Wheels to select from in the United States.

These Corsets are moulded by a patented apparatus the forms of which are after the finest French models.

By this process the Corsets are steam dried while stretched upon the form so that the size and shape are permanently retained.

They also have Linen or Silk Eyelets, that are ten times stronger than metal, and will not cut the lacings, poison the wearer or soil the garments by corrosion.

We append the following letters from four of our prominent physicians which explain themselves:

BRIDGEPORT, CONN., December 6th, 1882.

J. Alfred House, Esq.

DEAR SIR: The undersigned having carefully examined your "Arabesque Corsets" find one important characteristic in their construction which we deem a great merit, viz: the moulding or shaping the article, including its elastic element, whether horn or bone, to the outline of the body, thus taking off leverage and distributing the pressure equally over the whole surface, included within the garment. This obviates the tendency to deformity caused by excessive absorption of tissue at the points of greatest pressure and also makes the corset much more comfortable to the wearer.

Yours Respectfully,

ROBERT HUBBARD, M.D.
GEORGE L. PORTER, M.D.

BRIDGEPORT, CONN., December 6th, 1882.

J. Alfred House, Esq.

DEAR SIR: I have given your Arabesque J. H. Corset a critical examination with a view to its hygienic and health-causing principles. I take pleasure in saying that your corset presents at least two features that commend it to the medical expert and physicist. I refer to the moulding or shaping of the garment so as to adapt it to the figure in such a manner that the muscles of the body are supplemented and sustained, and the abdominal and pelvic viscera supported. The other valuable feature of your corset is the abolishment of the brass eyelet, and the substitution of a worked eyelet. It is unnecessary to state that the former will corrode because of the bodily exhalations and thereby might produce a cutaneous irritation.

Very Respectfully yours,

A. H. ABERNETHY, M.D.

BRIDGEPORT, CONN., October 20th, 1882.

J. Alfred House, Esq.

DEAR SIR: I have examined with some care the steam moulded corsets manufactured by you. They are the most perfect hygienically of any corset that I have ever noticed. Being steam moulded and ready shaped, they seem to be free from those radical objections applicable to most ordinary corsets which require to be fitted to the form of the wearer by a lacing process, that must, I apprehend, subject their abdominal and pelvic organs to a degree of compression that cannot be otherwise than injurious.
